Statement by the Board of Directors and the Senior Management

We have today considered and approved the interim financial statements for the period 1 January – 30 June 2007 for Nordic Tankers A/S.

The unaudited interim report has been prepared in accordance with International Financial Reporting Standards for inclusion and measurement as adopted by the EU and additional Danish disclosure requirements for interim reports for listed companies.

In our opinion, the accounting policies applied are appropriate and the interim report gives a true and fair view of the Group's assets, liabilities and financial position at 30 June 2007 and of the results of the Group's operations and cash flows for 1 January - 30 June 2007.

Holstebro, 29 August 2007.

Nordic Tankers A/S
Group overview at 30 June 2007

Accounting policies applied in the interim report

The interim report has been prepared in accordance with International Financial Reporting Standards for inclusion and measurement as adopted by the EU and which will apply in the Annual Report for 2007.

The accounting policies applied in the period 1 January - 30 June 2007 and 1 January - 30 June 2006 are the same as those applied in the company's Annual Report for 2006. We refer to the Annual Report for 2006 for further details of the accounting policies applied, including the definitions of the stated key figures and ratios that have been calculated in accordance with the guidance issued by the Danish Association of Financial Analysts for "Recommendations and Key Figures 2005".

Key figures are calculated per partial year.

Core business

In shipping circles, Nordic Tankers is what is known as a tonnage provider. This means that the company owns the vessels but that their commercial operation has been outsourced. Nordic Tankers has also chosen to outsource technical operation of the vessels and the majority of administrative operations.

Nordic Tankers is a Danish based shipping line which at 30 June 2007 wholly or partially owned seven vessels, with another three on order. The group has vessels in the three tanker segments: chemical tankers in the 10,000-13,000 dwt range and product tankers in which the company has tonnage in the LR1 and handy-size segment. The company has three wholly-owned LR 1 product tankers (one under construction) and a chemical tanker. The remaining six vessels, to of which are under construction, are jointly owned with highly reputable ship-owners.

Nordic Tankers' Vessels are operated in pools with other vessels of the same type. In the company's view, this ensures the best possible utilization of the fleet.

Significant activities in Q1-2/2007

The overarching activity in the company in the first half of 2007 was listing the company's shares on OMX - Copenhagen Stock Exchange. Work was also done over the past two on converting the company's ownership from an LLP to a listed limited liability company.

As part of the IPO, the company issued 1,830,000 new shares and the offering was met with significant interest by private as well as institutional investors in Denmark and the other Nordic countries. The offering was oversubscribed by a factor of four.

Shares were offered at DKK 85 per DKK 10 share. Shares were first traded on 12 June 2007. The proceeds from the listing totaled DKK 156m before placement costs.

On 22 June 2007, the over-allotment facility was exercised to increase the offering by a further 250,000 new shares. The maximum number of 250,000 shares was fully subscribed at a price of DKK 85 taking the total number of newly issued shares as part of the listing to 2,080,000 corresponding to capital of DKK 176.8m before placement costs.

On 1 June 2007, Nordic Tankers sold its two multipurpose vessels. The sale of these vessels meant gains of USD 4.5m after tax for the Group.

On 29 June 2007, Nordic Tankers acquired Eitzen Chemical's 50 % holding in Slichem Copenhagen Co. Pte. Ltd, Singapore and thus also in the chemical tanker "Slichem Copenhagen". This company and the vessel on now wholly owned by Nordic Tankers.

Financial trends

Group Q1-2/2007 earnings totaled USD 9.0m.

USD 5.5m of this was attributable to the results of terminating multipurpose vessel operations, with USD 4.9m pre-tax being attributable to gains on the disposal of the vessels and USD 0.6m deriving from operation of the vessels up to 1 June 2007.

Listing cost the company USD 2.8m, of which USD 0.9m was recognized in operating profits. USD 1.9m was booked to shareholders' equity by setting it against the proceeds of the IPO. Estimated costs in the prospectus were for a total of approximately USD 2.7m.

The Board regards these results as satisfactory.

Net revenues

Nordic Tankers' net revenues for continuing operations in Q1-2/2007 were up 136% at USD 19.1m from USD 8.1m in Q1-2/2006. The increase was mainly attributable to the new tonnage in the handy-size tanker segment and an increase in tonnage in the LR1 product tanker segment which saw two vessels in operation in Q1-2/2007 compared to only a single vessel in Q1-2/2006.

Net revenues, by segment

The company's net revenues derive from three continuing primary segments: LR1 product tankers, handy-size tankers and chemical tankers. LR1 product tankers accounted for the largest share of the company's net revenues from its continuing activities with a share of 47% in the first half of 2007 compared to 64% in Q1-2/2006, whilst the handy-size tankers and chemical tankers accounted for 34% and 19% of net revenues respectively in Q1-2/2007 compared to 0% and 36% in Q1-2/2006.

Net revenues grew by a total of 57% between Q1-2/2006 and Q1-2/2007. This growth was strongly affected by the company's establishment in the handy-size segment in the second half of 2006 and by the increase from one to two vessels in the LR1 product tanker segment. There was a modest increase in the chemical tankers segment

Please also see the segment data on pp. 18-22.

Operating costs

Operating costs for continuing operations amounted to USD 2,434m in Q1-2/2006 and were up 138% at USD 5,786m in Q1-2/2007. The increase in operating costs between Q1-2/2006 and Q1-2/2007 was due to a significant increase in tonnage in the LR1 product tanker segment, new tonnage in the handy-size tanker segment and to upgrades and repairs to damage aboard the Nordic Hanne, as well as increases in the vessels' crewing expenses.

Gross earnings

The marginally greater growth in operating costs of 138 % compared to 136% for net revenues led to the company's gross margin falling marginally from 70.0 % in Q1-2/2006 to 69.7 % in Q1-2/2007. Distributed by segment, gross margin fell from 74.3 % in Q1-2/2006 to 66.6 % in Q1-2/2007 in the LR1 product tanker segment and from 62.4 % in Q1-2/2006 to 63.9 % in Q1-2/2007 in the chemical tanker segment. The gross margin for the handy-size tankers in Q1-2/2007 was 77.3 %.

Gross earnings per ship-day for the LR1 product tanker segment remained at more or less the same level. In the first half of 2007, repairs caused some off-hire days. A vessel's operating costs when off-hire are about the same as they are when it is operating. The gross margin for the chemical tankers was slightly higher in the first half of 2007 than in Q1-2/ 2006 since freight rates per ship day rose more than the operating costs per ship-day in Q1/ 2007.

The gross earnings achieved were in line with company expectations.

HR costs

Personnel costs amounted to USD 0.068m in Q1-2/2006 and USD 0.339m in 2007. These are management costs. The headcount in Q1-2/2006 was one on average compared to two on average in Q1-2/2007.

Other external costs

Other external costs, that also included an administration contract with Difko Administration A/S, rent for the company's offices and consultancy fees, rose from USD 0.221m in Q1-2/2006 to USD 1.879m in Q1-2/2007. In addition to the rise in external costs in keeping with the increase in the company's level of activity, costs in Q1-2/2007 were significantly affected by the USD 0.935m expenses of the listing process and transition to IFRS accounting standards, including preparing and reviewing the Q1/2007 financial statements and reviewing the budgets and forecasts for 2007. Further, as noted above, listing expenses affected shareholders equity by USD 1.9m.

Depreciation and write-down

As a result of the company's fleet renewal program in the LR1 product tanker segment with the acquisition of Nordic Lisbeth and the purchase of the two handy-size vessels in 2006, tangible fixed assets rose from USD 82.2m in Q1-2/2006 to USD 168.5m at the end of the first of 2007. This was also reflected in the company's total depreciation and write-down which rose from USD 1.7m in Q1-2/2006 to USD 3.8m in Q1-2/2007.

Net interest expenses

Net interest charges amounted to USD 0.8m in Q1-2/2006 and USD 3.7m in Q1-2/2007. The increase was primarily due to raising funds for the acquisition of another product tanker and two handy-size tankers during 2006. Interest rates in general also rose during the period which also contributed to the increase in this item.

Tax on earnings Q1-2/2007

Nordic Tankers paid USD 0.009m in tax on Q1-2/2006 earnings and USD 0.018m in the first half of 2007. The company also expensed an adjustment of USD 0.194m for deferred tax in Q1-2/2006 and USD 0.195m in Q1-2/2007. The deferred tax related solely to the Nordic Hanne and is expensed for accounting purposes as the vessel is depreciated. The USD 0.097m effect of the change in the deferred taxation rate in 2007 from 28 % to 25 % was fully recognized in Q1-2/2007. The tax charge for the period also included a forecast liability of USD 0.368m on the profit from disposal of the two multipurpose vessels.

Minority interests' share of earnings for the period

The share for minority interests amounted to USD 0.051m in Q1-2/2006 and USD 1.100m in Q1-2/2007. The increase was due partly to higher earnings in the first half of 2007 than in the first half of 2006 and a significant minority interest share of the gains on the disposal of the terminating multi-purpose segment.

Terminating operations Net revenues from the two multipurpose vessels amounted to USD 1.938m in Q1-2/2006 and USD 2.040m in Q1-2/2007, corresponding to an increase of 5.3 %. Q1-2/2007 operating costs were by and large unchanged from the first half of 2006.

Balance sheet trends, Q1-2/2007

Assets

The company's total assets rose 15.9% from USD 182.8m at year-end 2006 to USD 211.9m at 30 June 2007.

Long-term assets rose from USD 166.0m at year-end 2006 to USD 168.7m at 30 June 2007. The increase was mainly due to further prepayments on vessels under construction and revaluation to market value of a vessel being set against depreciation in the period.

Net disposals on vessels and expensed docking charges alone amounted to USD 0.143m in Q1-2/2007. This relatively small change did however cover the transfer of an LR 1 tanker and a chemical tanker to assets destined for sale, a revaluation of USD 4.96m and the Nordic Copenhagen chemical tanker becoming wholly owned. The revaluation was due to the fact that in acquiring the remaining 50% holding of Sichem Copenhagen, Singapore, the company gained actual control of this company and so the previous holding in Sichem Copenhagen was upwardly adjusted to market value via shareholders' equity.

Prepayments on vessels under construction amounted to USD 14.6m at year-end 2006 and USD 17.5m at 30 June 2007. The increase was due to prepayments on a chemical tanker. The other prepayments related to three product tankers, an LR1 product tanker vessel and 50 % holdings in two handy size vessels.

The company's total inventories and trade accounts receivable amounted to USD 8.7m at the end of Q1-2/2007 and USD 6.1m at year end 2006. The increase was mainly due to a rise in other receivables due to the increasing level of activity. The company's cash funds amounted to USD 16.3m at the end of Q1-2/2007 and USD 5.0m at year end 2006. The increase was mainly due to the proceeds of the Stock Exchange listing.

Assets destined for sale at 30.06.2007 related to the LR1 product tanker Hanne and the chemical tanker Sichem Pearl which was sold after 30.06.2007. Assets at 30 June 2007 totaled USD 18.2m. At year-end 2006, assets destined for sale amounted to USD 5.7m and only related to the multipurpose segment.

Liabilities

Liabilities rose by USD 29m between year-end 2006 and the end of the first half of 2007.

Nordic Tankers A/S' share of equity rose from USD 54.6m at year-end 2006 to USD 96.4m at the end of the first half of 2007. The USD 41.8m increase was mainly due to net capital inflows of USD 29.7m associated with the Stock Exchange listing, a USD 5.0m revaluation of chemical tankers and to earnings during the period and other adjustments amounting to USD 7.1m net. Please also see the shareholders' equity statement below.

Total commitments amounted to USD 127.5m at year end 2006 and USD 115.4m at the end of Q1-2/2007. The decrease in total debt in Q1-2/2007 was mainly due to repayments on loans raised to finance the acquisition of vessels and to redemption of loans in connection with the sale of vessels.

Commitments relating to assets destined for sale at 30.06.2007 related to the LR1 product tanker Hanne and to the chemical tanker Sichem Pearl. Commitments at 30 June 2007 totaled USD 7.0m. At year-end 2006, commitments for assets destined for sale amounting to USD 2m and related to the multipurpose segment.

Cash flow, Q1-2/2006 and Q1-2/2007

Nordic Tankers' cash inflows from continuing operations amounted to USD 8.2m in Q1-2/2006 and USD 5.6m in Q1-2/2007. Cash flows from operations were mainly attributable to the company's earnings.

The company's cash flow from investment operations related to the company's net additions of tangible fixed assets. USD 50.0m net was spent on investments in the first half of 2006 compared to net investments of USD 1.1m in the first half of 2007. Investments in 2006 were in LR1 product tankers whereas in 2007 these mainly related to the sale of the multipurpose segment and the acquisition of holdings in the chemical tanker segment.

Cash inflows from financing operations in the first half of 2006 related to two short and long-term mortgage loans raised for financing the acquisition of vessels. The company's cash flow from financing operations totaled USD 35.8m in Q1-2/2006 compared to USD 9.0m in Q1-2/2007 which mainly derived from the proceeds of the Stock Exchange listing and repayments of borrowing facilities.

Outlook

Trading conditions in the primary chemical and product tanker markets in the first half of 2007 were better than expected which has ensured a strong springboard for the second half of 2007 and indeed the whole year.

Nordic Tankers is also forecasting strong underlying demand in the second half for tonnage for refined oil products, chemicals and vegetable oils. Relatively stable freight revenues are accordingly expected to continue in the markets in which the company's vessels are engaged.

The entrance of many newly-built product tankers onto the market is expected to be balanced by certain significant factors such as a continuing increase in the ton-mile factor, also as a result of imbalance between the refineries' output mix and geographic demand for individual products, and insufficient refinery capacity in general in the western world.

The rate at which elderly tankers and single hulled vessels are scrapped is expected to increase, along with increasing demand for IMO classified tonnage for vegetable and palm oils and a general increase in demand by the major oil companies and traders for modern, quality tonnage.

The Stock Exchange listing has given Nordic Tankers a good starting point for positive developments in coming years. The prospectus issued for the listing contained a strategy in which the main point was renewal of the company's fleet which would bring down the average age of the fleet to about two years. Nordic Tankers' strategy is also to achieve a better balance for revenue and earnings distribution between the tanker segments.

The company has been successful in achieving this strategy more rapidly than anticipated. Since the listing, the following transactions have been completed;

- On 29 June 2007, Nordic Tankers acquired Eitzen Chemical's 50 % holding in the 12,800 dwt chemical tanker "Sichem Copenhagen" built in 2005. This vessel is now wholly owned by Nordic Tankers.
- On 2 July 2007, Nordic Tankers acquired Eitzen Chemical's 50 % holding in the 12,800 dwt chemical tanker "Sichem Oslo" built in 2005. This vessel is now wholly owned by Nordic Tankers.
- On 2 July 2007, Nordic Tankers sold its 50 % holding in the chemical tanker "Sichem Pearl" built in 1994 to Eitzen Chemical. The disposal gave a gain of USD 3m after tax.
- On 14 August 2007, Nordic Tankers sold its LR1 product tanker "Nordic Hanne". The vessel was built in 1987. The disposal gave a gain of approx. USD 7.5m after tax.
- Nordic Tankers acquired a chemical tanker "Nordic Stockholm" for delivery in the latter half of August 2007. Built in 2007, the vessel is 12,800 dwt.
- Nordic Tankers has bought a 10,000 dwt chemical tanker, "Nordic Helsinki", for September 2007 delivery from the shipyard.

Both the newly-acquired chemical tankers will operate in the same Eitzen Chemical City Class pool as their two sister ships.

The company's original forecast for 2007 was for profits of USD 13 -14m. Following the company's listing, the forecasts for 2007 were upwardly adjusted to earnings of USD 16 – 18m.

The company is expecting the results of operations for the remainder of 2007 to be broadly in line with budget. The company has further achieved significant gains of approximately USD 10.5m after tax from disposal on the vessels "Sichem Pearl" and "Nordic Hanne".

Management is still expecting to achieve revenues of the order of USD 39 - 41m, and earnings (EBITDA) of USD 25 - 27m. On the basis of the gains already made on the vessels in the second half of 2007, the overall forecast for the Group's consolidated earnings has been raised to approximately USD 23 - 25m, including gains of USD 15.0m after tax from the sale of vessels. The minority interest

share of earnings is expected to be about USD 1.1m, and so Nordic Tankers A/S is expecting the parent company's share of earnings to be of the order of USD 22 - 24m after tax.
